• Summary: Use OpenWeather API calls to produce current climate as well as next 5 day forecast for user searched locations.

• Role: Front end designer

• Tools: HTML, CSS, JavaScript, Bootstrap, Api calls

## EXPERIENCE

**Owner/Operator, 2018-Present Chu Chut Pty Ltd, Adelaide, SA** A city based cafe with a fusion of Western breakfast favorites and Japanese focused lunches, aimed at catering to the office clientele who require a fast turn around and not compromise on quality.

Key Accomplishments:

• Co-developed a Japanese-style cafe from an empty venue through extensive and

thorough research, trial and error and finally, implementation.

- Working within a smaller and more intimate team to produce quality produce in efficient time constraints
- Meticulously implemented and maintained a high level of standards both front and back of house, resulting in consecutive '5 Star' ratings from Adelaide City Council inspectors.

**Owner/Operator, Sit Lo pty ltd, 2014-2021, Adelaide, SA** Vietnamese street food with Australian modifications to serve faster and more appealing to the city consumer. With focus on speed as well as quality, this eatery became popular with students, office and shift workers.

Key Accomplishments:

- Took an empty structure, analysed the task, organised the team, project-managed the transformation.
- Earned and recognised in the Advertiser City Awards, #1 in the category for 'Best Lunch -CBD' two years in a row.
- Expanded and evolved the business model into catering, deliveries, functions and events.
- Trained new servers and helped management create training guides and procedures to allow the business to expand into a second and third venue.

## **EDUCATION**

**Certificate, Full Stack Web Development, University of Adelaide - 2022**

**University Senior College, Adelaide – 2003 :2004**

**Trinity College, Gawler – 1992 : 2002**
